### Projects

#### ➤ Foot Step Energy Generation

- When you walk on a special floor with built-in piezoelectric material, your steps press on it.
- This squeezing action makes the piezoelectric material create a bit of electrical power, like magic!
- We save this electricity in batteries or capacitors so we can use it later for things like lights or other cool stuff.

#### ➤ Student Digital Grading System

**Tech Stack :** JavaScript, PHP, Apache MySQL

- A measure of student progress and an evaluation of academic performance.
- Provides real-time access to grades, so students and parents can monitor progress.

#### ➤ AquaManage

**Tech Stack :** Html , CSS, Bootstrap, PHP

- Develop a database schema to store information about waterpurifiers, vendors, and orders.

#### ➤ Farmers Hub

**Task Stack :** Bootstrap, Html, CSS

- Where they can see to which crop which fertilizers have to give.
- We need of water and chemicals to vegetables and fruits.
- The farmers can check the weather of each state and district.
